SLEEP DENTISTRY
for children

Dr. Bryan Waxman
BHSc(Hon), DDS, Dip Anes., Dip ADBA
Dental Anesthesia Specialist

TO OUR VALUED CURRENT AND PROSPECTIVE REFERRING DENTISTS AND TEAMS:

Dr. Bryan Waxman and the VAUGHAN MILLS SLEEP DENTISTRY team wanted to inform Dental Offices that due to the increased demand and interest in our office for paediatric general anaesthesia, we have **FULLY DEDICATED OUR PRACTICE TO TREATING CHILDREN AGED 2+ WHO REQUIRE THEIR DENTAL WORK DONE ASLEEP.**

Our office is unique because we perform dentistry under **General Anaesthesia for children DAILY**. Our office is completely tailored and built for this type of specialized treatment with explicit safety protocols, and trained healthcare professionals for anaesthesia. We are a Type A sedation facility and operate with critical care Registered Nurses and Anaesthesia-focussed dental assistants.

Many dentists and their teams are currently realizing and benefiting from the care, safety, and flexibility our office provides for their referred children. We have a vast referral network with wide extensions geographically due to the uniqueness and reliability of our specialty dental office.

- We understand the financial burden created by treating multiple primary and/or permanent teeth in one appointment on top of anaesthesia fees, and **we are proud to accept Assignment of Benefits if necessary for patients holding private dental insurance.**
- **We proudly accept the Healthy Smiles Ontario program (despite the financial deficiencies) to increase access to care for all children.**
- **We routinely complete all required dental work for children in one visit asleep.**
- **WE SEND ALL PATIENTS BACK TO THEIR REFERRING DENTIST:** we do not have a hygiene or recall program in our practice. These are your patients, and they deserve to be sent back to their Dentists/Hygienists so families stay together in your practice. We provide a full treatment letter and x-rays can be e-mailed upon request.

Please never hesitate to contact the office by phone at 1-905-760-9800 or via e-mail at info@vmsdentistry.com. Our website, www.vmsdentistry.com, is very informative as well for your perusal. We look forward to starting (or continuing) a valued professional relationship with you and your referrals and taking great care of your valued children in your practice!

Sincerely,
Dr. Bryan Waxman, BHSc(Hon), DDS, Dip Anes, Dip ADBA
Certified Specialist in Dental Anesthesia (On)

DR. BRYAN WAXMAN BIOGRAPHY

Dr. Waxman is a Certified Specialist in Dental Anaesthesiology in Ontario. His education consists of a Bachelor of Health Sciences (Honours) in 2005 from the University of Western Ontario. He then graduated from the University of Toronto DDS program with Honours in 2009 with numerous awards/scholarships. After completing dental school, he pursued a Residency in Dental Anesthesiology from Stony Brook University, Long Island, NY in a tertiary care facility. He was the Chief Resident of the program in his senior year.

He is also a past 10-year Clinical Instructor at the University of Toronto for Graduate Anesthesia Residents in the Pediatric Surgicentre as well as a lecturer for continuing dental education in medical emergencies and other various anesthesia topics. Dr. Waxman is a past interviewer for the DDS admissions committee at U of T and a past oral board examiner for the American Dental Board of Anesthesiology. Additionally, Dr. Waxman is a Diplomate of the American Dental Board of Anesthesiology (ADBA). He is a Past-President of the Canadian Academy of Dental Anaesthesia (CADA), member of the ODA and CDA.

Dr. Waxman has a true passion for providing paediatric anaesthesia and dental rehabilitation for children along with his focused and caring team.
